## DAMASCUS

### \*7. Description

Although the town of Damascus was laid out in 1816, what remains in the way of historic resources is a group of 19th and early 20th century frame, residential structures on Route 108 (Main Street), going east from the intersection of Routes 108 and 124 (Woodfield Road); a group of early 20th century commercial buildings on Ridge Road near the intersection of Ridge and Main (and one early 20th century residence on Main, near Ridge); and a 1940's Art Deco-style theatre on Main street.

### Early 20th Century Commercial Properties

Prominently situated at the intersection of Main Street (Route 108) and Ridge Road (Route 27) is Bellison's Carry Out, 9899 Main Street, formerly known as the Russell Duvall / Roby Miles general store. The store has been a fixture in the community for over 70 years. It was erected in 1914 by Russell Duvall on a lot purchased by him the previous year. Duval owned and operated the business for ten years before selling it to Roby Miles, who operated it for the next 20 years. It served (during those years) as a kind of "community center" and as the place where people came to see their neighbors as well as to buy groceries.

Bellison's Carry Out is a large, rectangular, one-and-one-half story, three bay, stucco-covered structure with a front gabled roof; it sits on a brick foundation. A shed roof supported by metal poles provides cover for the main (south) facade, with its center entrance and two large windows, and for part of the west facade.

Mr. Miles enlarged the building substantially in the 1940's, doubling its size by adding on to the rear and putting in a basement. According to Mr. Miles' widow, the building is otherwise unaltered.

Next to Bellisons, at 9875 Main Street, is the residence which Mr. Miles built in 1915 and which is still occupied by his wife. The Miles' house is a two-and-one-half story, three bay structure with a hipped roof and a single front dormer. A one-story shed-roofed balustraded porch extends across the main (south) facade, supported by square pillars on brick piers. An entrance in the west facade is sheltered by a gable-roofed portico. Brick steps lead up to the porch.

Adjacent to Bellison's Carry Out, on the east side of Ridge Road, is the former Purdum store, now the Gladhill Building, at 26307 Ridge Road. Built for Christopher Purdum about 1908, this large two-and-one-half-story, three bay, front-gabled building has a brick main (west) facade. The brick was added in the 1930's and the original lapped wood siding is still visible

## Damascus Description (cont.)

on the north facade. The main two-and-one-half story section of the building now houses The Outlet Store; a one-story, three bay flat-roofed addition on the south facade (added in the 1940's) is occupied by a butcher shop. A columned, gable-roofed portico was added to the entrance of the main building in the late 1970s. On the north facade, there is a two-story shed-roofed garage which also dates from 1950s both the garage and the main building have seamed tin roofs.

The Gladhill building is typical of the two-story general stores which existed in the Damascus area early in the 20th century; it may be the only one of its type remaining. It has largely retained its original configuration, with the changes noted above.

A blacksmith shop (no longer standing) was built nearby for Purdum at the same time the store was erected.

On the same side of the road, near the Gladhill Building, is the James Mount residence, presently the Olin Molesworth Funeral Home, at 26401 Ridge Road. Built for James Mount (the son of John Mount, the local builder) about 1910, the structure has been used as a funeral home since 1922.

The Mount residence is a two-and-one-half-story, three bay Colonial Revival structure with a hipped roof; it is covered with lapped wood siding. The second floor has a one-and-one-half story central gable-roofed projecting pavilion with two multi-paned windows; the smaller of the two is located in the gable end. There is a shed-roofed one-story porch across the main (west) facade, with a metal balustrade; it is supported by classical columns. A pedimented entranceway with paired columns at the front of the porch leads to a center entrance with a panelled door and sidelights. Both the roof and porch cornices are dentiled. The south facade has a two-story projecting bay and there is an enclosed porch across the rear. A one-story brick addition on the north facade (added in the 1960's to serve as a chapel) wraps around to the rear. The addition of the brick chapel and the enclosure of the rear porch constitute the only exterior alterations to the original structure.

### Early Residential Structures

The earliest residential structures in Damascus are located on Route 108 (Main Street) near the intersection of 108 and Woodfield Road (Route 124). Five of these are in the 9700 and 9600 blocks of Main Street, forming an impressive grouping of 19th and very early 20th century structures.

The first of these buildings, the Henry Edwards Residence, at 9727 Main Street, may also be the oldest of the group. A two-story, three bay, stuccoed structure with a side-gabled roof and a large, external fireplace chimney on the west wall, the Edwards residence probably dates from the

## DAMASCUS

### \*7. Description

Although the town of Damascus was laid out in 1816, what remains in the way of historic resources is a group of 19th and early 20th century frame, residential structures on Route 108 (Main Street), going east from the intersection of Routes 108 and 124 (Woodfield Road); a group of early 20th century commercial buildings on Ridge Road near the intersection of Ridge and Main (and one early 20th century residence on Main, near Ridge); and a 1940's Art Deco-style theatre on Main street.

### Early 20th Century Commercial Properties

Prominently situated at the intersection of Main Street (Route 108) and Ridge Road (Route 27) is Bellison's Carry Out, 9899 Main Street, formerly known as the Russell Duvall / Roby Miles general store. The store has been a fixture in the community for over 70 years. It was erected in 1914 by Russell Duvall on a lot purchased by him the previous year. Duval owned and operated the business for ten years before selling it to Roby Miles, who operated it for the next 20 years. It served (during those years) as a kind of "community center" and as the place where people came to see their neighbors as well as to buy groceries.

Bellison's Carry Out is a large, rectangular, one-and-one-half story, three bay, stucco-covered structure with a front gabled roof; it sits on a brick foundation. A shed roof supported by metal poles provides cover for the main (south) facade, with its center entrance and two large windows, and for part of the west facade.

Mr. Miles enlarged the building substantially in the 1940's, doubling its size by adding on to the rear and putting in a basement. According to Mr. Miles' widow, the building is otherwise unaltered.

Next to Bellisons, at 9875 Main Street, is the residence which Mr. Miles built in 1915 and which is still occupied by his wife. The Miles' house is a two-and-one-half story, three bay structure with a hipped roof and a single front dormer. A one-story shed-roofed balustraded porch extends across the main (south) facade, supported by square pillars on brick piers. An entrance in the west facade is sheltered by a gable-roofed portico. Brick steps lead up to the porch.

Adjacent to Bellison's Carry Out, on the east side of Ridge Road, is the former Purdum store, now the Gladhill Building, at 26315 Ridge Road. Built for Christopher Purdum about 1908, this large two-and-one-half-story, three bay, front-gabled building has a brick main (west) facade. The brick was added in the 1940's and the original lapped wood siding is still visible

## Damascus Description (cont.)

and (like the two side gables) a return cornice and decorative diamond-shaped shingles. A one-story shed-roofed porch with bracketed turned posts covers the main facade. The windows are 2/2 and both the main and porch roofs are of seamed tin.

A two-story gable-roofed section at the rear forms an ell with the main block of the house. There is also a one-story, shed-roofed addition at the east rear corner, where the main block and rear addition meet. The house rests on a stone foundation.

The William Baker House, at 9703 Main Street, is an early 20th century structure. Built in 1913, it remained in the Baker family until 1963.

The Baker house is a two-and-one-half-story, three bay front-gabled structure with a one-story, shed-roofed wrap-around porch with turned posts. The front gable has a window and decorative shingles. There is a two-story, gable-roofed projecting bay, with decorative shingle at the gable, at the northwest corner of the house. Except for the gables, the structure is covered with lapped wood siding and windows are 2/2. At the northeast corner of the house, part of the porch has been enclosed.

In the next block, the Rosa Stanley House, at 9615 Main Street, was built by John Mount in 1907 on land he had owned since 1874. The present owner, Mrs. Rosa Stanley, has occupied the house since 1916. John Mount was her husband's grandfather.

The Stanley house, at the Intersection of Main Street and Town Spring Road, is a two-story, three bay side-gabled structure with a two-story gable-roofed ell at the rear. A one-story shed-roofed porch with bracketed posts covers the main (south) facade. The house and porch roofs are of seamed tin and the windows are 2/2.

In the next block is the Levi Pearce House, at 9507 Main Street. Erected in 1891 (probably by John Mount) the Pearce house is a two-story, three bay, side-gabled structure with a center peaked gable with a small pointed-arch window. A one-story shed-roofed porch with a balustrade covers the main (south) facade. The porch is supported by square columns resting on piers of rough-cut stone. The house has a center entrance with sidelights. There is a two-story, gable-roofed ell addition at the rear and a one-story shed-roofed addition at the northeast corner of the house.

A blacksmith by trade, Levi Pearce built a blacksmith shop near his residence which was a landmark in Damascus for many years.

One block to the east, on the south side of Route 108, there are several additional older (probably late 19th century) residences. The house at 9340 Main Street is a large, two-and-one-half story, three bay, center-entrance

## Damascus Description (cont.)

side-gabled structure with a peaked center gable in the main (north) facade. Both the center gable and side gables have small pointed-arch windows and decorative diamond-shaped wood shingles and the side gables feature return cornices. A one-story, shed-roofed porch which now covers only the main facade can be seen (from a 1974 photograph) to have wrapped around to the east side of the building. The porch is supported with bracketed posts and windows are 2/2.

A two-story gable-roofed ell extends out from the rear of the house and there is a one-story shed-roofed porch over an entrance on the east facade (all that remains of the original porch on that side).

Although currently in poor condition, this residence incorporates the architectural features found on the other early residences.

Next door, at 9436 Main Street, is a much simpler two-story, four bay, side-gabled house with a seamed tin roof. A one-story, shed-roof porch with bracketed posts covers the main (north) facade. There is a two-story shed-roof addition at the rear corner of the east facade.

The residence at 9460 Main Street, across from the intersection of Howard Chaped Road and Route 108, is more complex in form than the structures described above. It is a two-and-one-half story, four bay, hipped roof structure with cross gables. A one-story shed-roofed porch with decorative brackets stretches across the main facade, whose surface is broken by a two-story, gable-roofed projecting bay at the east corner of the main (north) facade. There is a one-story projecting bay on the east facade and a one-story shed-roofed addition across the rear. The windows are 2/2, the house is covered in lapped wood siding, and the roof is seamed tin.

The Druid Theatre, 9840 Main Street, is significant historically because it has remained unaltered, retaining its identity as a 1940's movie theatre. It is significant architecturally because it exemplifies the radical change in theatre design which took place in the 1930's and 40's, when the Art Deco style became popular. "It was not until the early 30's that the first consistently Deco theatres were built in American cities. The picture palaces of the 20's --- were invariably built in eclectic combinations of traditional styles."<sup>(1)</sup> The Druid, a product of the 1940's, combines elements of both Art Deco and another early 20th century style, Art Moderne. "In most building types, both the horizontal, streamlined Art Moderne and the vertical, zig-zagged Art Deco influences occur in combination."<sup>(2)</sup>

Construction on the 400 seat Druid theatre began in 1945 and was not completed (because of post-war shortages of materials) until 1947; the Druid opened in May of that year. It was named after the man who built it, Mr. Druid Clodfelter, a native of Damascus who still lives next to the theatre. Mr. Clodfelter sold the Druid to its present owner in 1977.

## Damascus Description (cont.)

The Druid is an almost exact copy of one of Washington's finest Art Deco theatres, the Apex, built in the 1940's and demolished in 1977. The plans for the Apex were, in fact, copied and used in the construction of the Druid. Many of the firms involved in the Apex project also worked on the Druid.

The prototype for the Druid, the Apex, was designed by a well-known movie house architect of the period, John J. Zink, of the Baltimore architectural firm of Zink, Atkins and Craycroft. "The (Zink) firm was the acknowledged regional specialist in movie houses and built over 200 theatres in Baltimore, New York, Washington and other eastern cities."<sup>(1)</sup> Zink was responsible for designing eleven Deco theatres in Washington.

The Druid was the first fully air-conditioned theatre in Damascus and the first to have a separate glass-enclosed "crying room" where families with babies could enjoy a movie without disturbing other patrons. The admission price (in 1947) was \$0.25 for children and \$0.44 for adults; in 1965, admissions went to \$1.00.

In the 1940's and 50's the Druid supplemented its movie schedule with stage performances several times a week. Country music stars (many of them from the "Grand Ole Opry") were usually the featured performers. The Druid was one of the few theatres in the area which was never part of a "chain", and the current manager still handles her own bookings and advertising.

The Druid is a two-story, five bay, flat-roofed building of tan brick, with the main (south) facade faced in grey limestone. Extra height is given to the south facade by a parapet which extends several feet up beyond the roof edge. One-story, three-bay, flat-roofed "wings", built at the same time as the theatre and leased for a variety of commercial purposes over the years, extend from both the east and west facades.

The theatre's large symmetrical facade is broken by five vertical recessed bays, each featuring a long, narrow window. The only other decorative elements on the limestone facade are the Deco-style zig-zag patterns cut into the stone at the roofline, at both the east and west corners, and the name of the theatre in large (at one time, neon-lit) letters in the middle of the facade. The sweeping four-tiered marquee is painted in three shades of blue and one of red and rows of neon lights are attached to its underside. The theatre entrances are flanked by curved corner walls of glass block, a material often found in Art Moderne buildings.

Relatively plain in design and decoration, the Druid, nevertheless, exhibits many of the features which marked the Art Deco buildings of the early 30's and 40's. It is "streamlined" in appearance, as befitted a style which symbolized a "breaking away" from the past and a turning toward the new technology of the machine age. Its smooth surfaces, curved corners and

## Damascus Description (cont.)

strong horizontal lines (characteristics usually associated with Art Moderne) all contribute to its streamlined look. At the same time, the features which give its facade verticality (such as the parapet and the recessed windows) are more Art Deco in spirit.

The lobby of the theatre is not ornate, but the original deco-style metal ceiling fixture (which has been outlined with several painted bands of color) remains. In addition, the Deco influence is seen in the painted border which follows the curve of the walls, where ceiling and walls meet. Murals of horses which once adorned the walls have been painted over.

In the auditorium, the Deco influence is apparent in the abstract design of the painted border which decorates the ceiling. Decorative plasterwork has been used to create a series of ceiling ridges which follow the lines of the border design.

On each side of the stage (still hung with its original curtain) are painted panels depicting a farmer and a horse ploughing a field. Paintings or sculpture which idealized the "common man" were popular decorative motifs in Art Deco and Art Moderne buildings. The walls of the auditorium are covered with the original patterned material and many of the seats are still covered with the original mohair. The projection booth contains the equipment installed in 1947, which is still in use.

The Druid, in design, interior decor and mechanical equipment, is a remarkable "relic" of the past, but a relic which is still very much in use and which has retained its architectural integrity.

## DAMASCUS

### 8. Significance

From the early 1800's to the present, Damascus has been a commercial center for the rural communities which surround it. Its significance is based upon its historic role as a crossroads community providing goods and services to travelers and residents of the area.

Located at the highest point in the county and at the intersection of two important early roads, the Old Quaker Road (Route 27) and the Damascus - Laytonsville Road (Route 108), Damascus was founded in 1816 when Edward Hughes laid out 14 lots of various shapes and sizes, averaging 1/2 acre, and offered eight of them for sale. His advertisement in the Fredricktown Herald on October 12, 1816 noted that the "new town of Damascus" had "an extensive opening for mechanics of all the different kinds --- (and that) a law of Congress was passed at the last session establishing a post route through the town and an office in it. There is at present two blacksmith shops, a saddler's shop and a store --- a taylor, a wheel wright, and a shoemaker are much wanted ---."

Hughes (who served as Damascus' first postmaster in 1816 and, from 1825 to 1829, as a member of the House of Delegates) named his "new town" after an early land grant of 1,101 acres called "Pleasant Plains of Damascus," surveyed in 1783 for Nathaniel Pigman. In 1814, Hughes purchased 40 acres of Pigman's tract; included in the purchase were stables and a blacksmith shop. His original 14 lots were located on the south side of what is now Main Street.

Many of the early settlers in the Damascus area were descendants of prominent families who had settled earlier in Anne Arundel County and in other parts of Montgomery County. Descendants of these early settlers, with such names as Burdette, Morley, Miles and Griffith, can still be found in the Damascus area.

In spite of Hughes' enthusiasm, the town grew slowly, due, no doubt, to the fact that it was never linked to the railroad. By 1890, however, Damascus had grown sufficiently for the townspeople to seek incorporation. Damascus was incorporated for 24 years, until 1914, when the corporation was dissolved to allow for the construction of the first paved road within the town limits by the State Roads Commission. Now Route 27 (Ridge Road), it was the main road from Washington to Frederick from 1914 to 1926.

Several important early roads passed through Damascus, connecting it with larger communities in the state and with the District of Columbia. The Old Quaker Road (Route 27, Ridge Road, south of Damascus) was an important thoroughfare in Maryland even before the Revolutionary War. It served as one of the "principal market roads" of the province and as a main route from Fredricktown to Annapolis. Maryland Route 108 was an early route from Laurel to New Market, roughly following the Patauxant River Valley.

## Damascus Significance (cont.)

In March of 1884, with the increase in the county's population, Damascus became the center for a new election district, election district number 12.

The last two decades have seen much of the farmland around Damascus converted to housing, as federal agencies and private corporations opened offices in Montgomery County and drew newcomers to the area. The countryside around Damascus still remains predominantly rural, however, and Damascus (which now has a population of approximately 5,000) still remains a commercial center for the rural communities of Clagettsville, Browningsville, Cedar Grove, Woodfield, King's Valley, Purdum and Lewisdale.

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE	
<p>This village has long been the commercial center for the surrounding agricultural community.</p> <p>There are a number of late 19th-early 20th Century, Victorian, farm-type houses along Rte. 27 and Rte. 108. Going west to east, there is a bank barn with a shingle roof on the Souder property. Above this is a farmhouse that may have belonged to the Burns family (ca. 1878.) Going north from town on Rte. 27, several houses line the road.</p> <p>The oldest houses in town are located directly on Rte. 108 at Rte. 124. The first of these is a three-bay (south facade) structure with a large, external, fireplace chimney on the west wall. The house has been Victorianized with a center gable and bracketed porch, but the windows remain 6/6. Next to this is a five-bay structure with three peaked center gables and bargeboards, as well as a one-story, bracketed porch. Continuing east, there is the site of the old town spring, and a number of fine, late-19th Century, frame houses lining the south side of Rte. 108.</p> <p>Most of the old stores, etc., from the town (laid out in 1816) have been removed, but the old Smith house or store may remain on Locust Ave. (See separate file on this, and the Nathan Burdette House.)</p> <p>The best published history of the town is by Mrs. Janie Payne, Aug. 1966, in the <u>MONTGOMERY COUNTY HISTORICAL SOCIETY STORY</u>. Early photos, etc., have been run in the <u>COUNTY COURIER</u>, a newspaper published in Damascus.</p>

ACTION TAKEN

FINAL DRAFT AMENDMENT  
TO  
THE MASTER PLAN FOR HISTORIC PRESERVATION

M: 11-6

The purpose of this amendment is to remove the Damascus Historic District from the Locational Atlas and Index of Historic Sites in Montgomery County and to designate one resource within the area as an individual Historic Site to be protected under the County's Historic Preservation Ordinance, Chapter 24A of the Montgomery County Code:

<u>Atlas Number</u>	<u>Site</u>	<u>Location</u>	<u>Associated Acreage</u>
11/6-2	Druid Theater	9840 Main Street	1.74 Acres
-	Constructed between 1945 and 1947, this "streamlined" theatre exhibits features of the Art Deco/Moderne styles including zig-zag patterns cut into the roof line of its limestone facade, a sweeping four-tiered marquee and an entrance flanked by curved corner walls of glass block.		
-	Largely unaltered, the Druid is based on a design by the regionally well known movie theatre architect of the period, John J. Zink, and is one of only three period theatres remaining in the County.		
-	This amendment recognizes that the Druid Theater, because of its scale, prominent location, and distinctive architecture, has emerged as a landmark along Main Street. The intention of designation is to seek the preservation and integration of the significant architectural features of the theater building proper in any adaptive reuse or redevelopment.		

Sites within the Damascus Historic District not recommended for regulation under the Historic Preservation Ordinance are listed in the Appendix.

ACTION TAKEN

M: 11/6                      Damascus Historic District

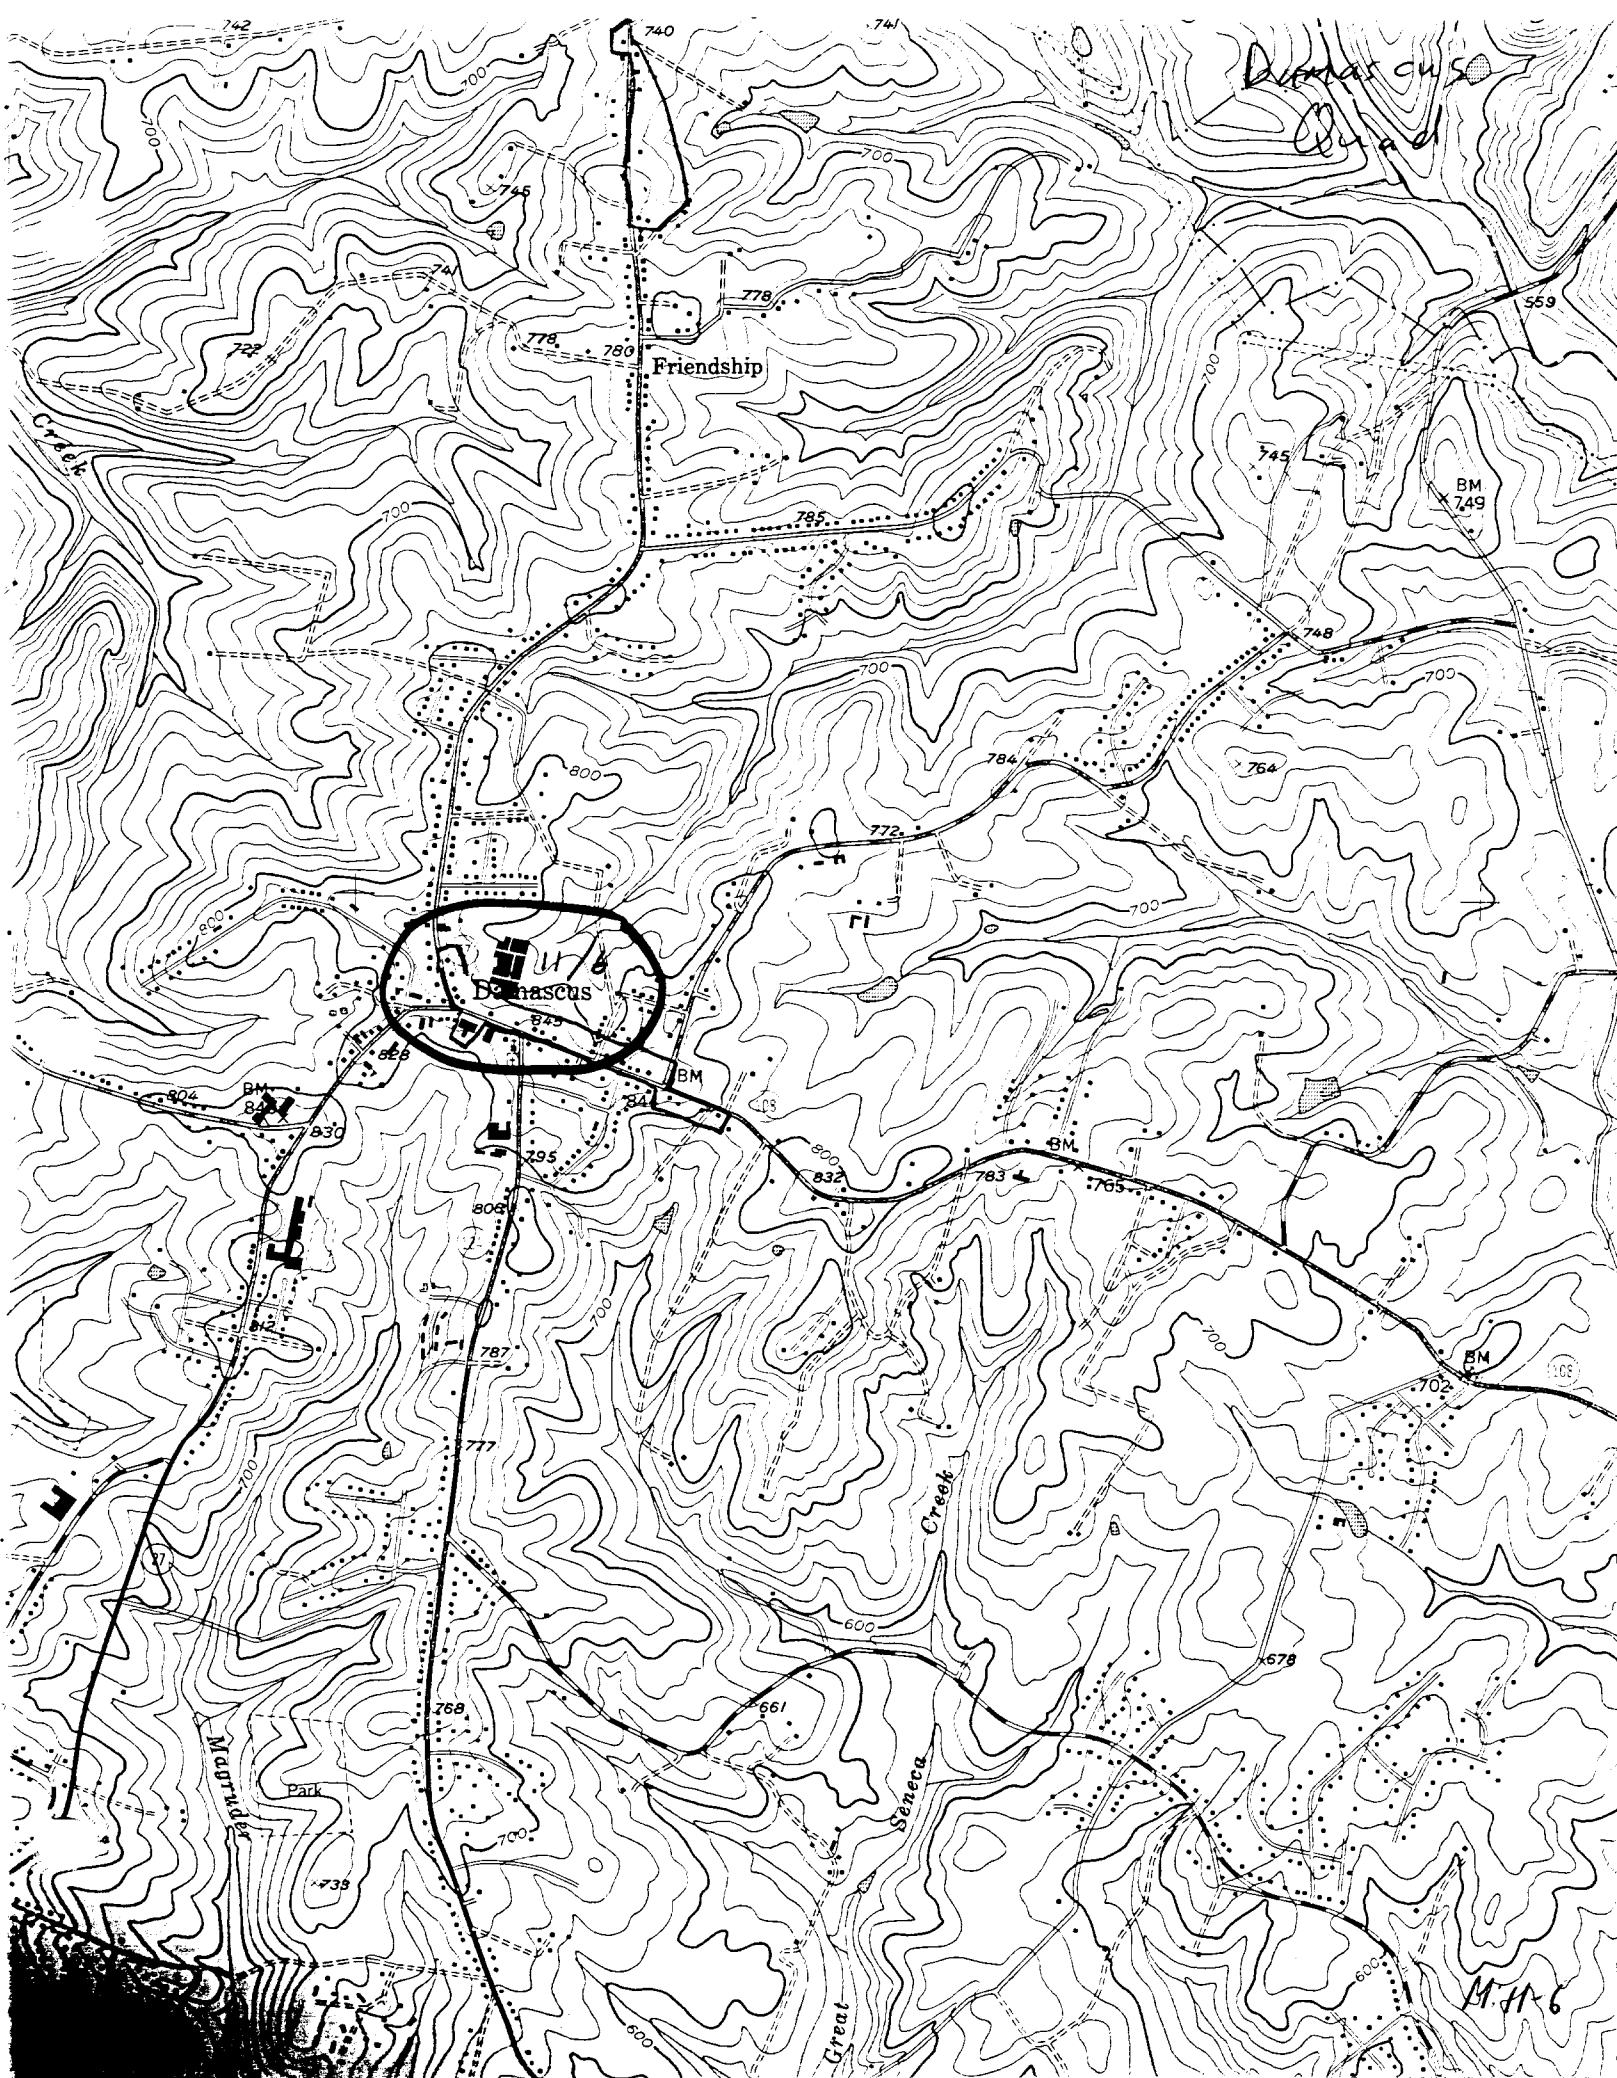

PRELIMINARY DRAFT AMENDMENT  
TO  
THE MASTER PLAN FOR HISTORIC PRESERVATION

The purpose of this amendment is to consider the recommendation of the Montgomery County Historic Preservation Commission to remove the Damascus Historic District from the Locational Atlas and Index of Historic Sites in Montgomery County and to designate the following resources within the area as individual Historic Sites to be protected under the County's Historic Preservation Ordinance, Chapter 24A of the Montgomery County Code:

<u>Atlas Number</u>	<u>Site</u>	<u>Location</u>	<u>Associated Acreage</u>
11/6-1	John Mount House	9721 Main St.	5.73 Acres
11/6-2	Druid Theater	9840 Main Street	1.74 Acre
